Coder Assessments in ICD-10:
# Practical Workflows to Score Coder Knowledge

So many questions…So little time

Your coders are new to ICD-10. So are your payers, auditors and coding managers. 60%? 70%? 80%? The true percentage of code accuracy is a moving target.

Instead of waiting for denials or manual audits to know if your coders are correct, take preventative action with Central Learning.
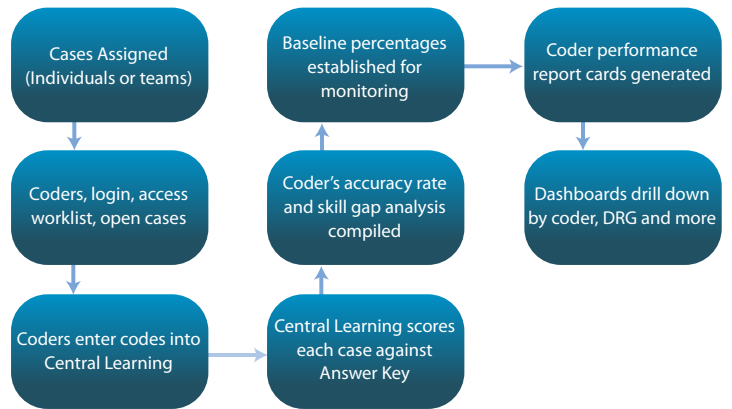

Central Learning is a smart and efficient way to assess coders. The web-based system automatically scores and audits coder knowledge using real cases for:

- Immediate management feedback
- Skill gap analysis by coder
- Dashboards to proactively monitor trends and take action

Practical workflows save time and money

Traditional, manual coding audits drain resources and demand focus. With Central Learning, coding managers and auditors are up to 40% more efficient by automatically grading and scoring coder skills. Central Learning is simple to use. Here's how it works.

"Traditionally 4-5 days were required for our ICD-10 coding manager to review coder's codes, score and analyze data results. With Central Learning, this is done instantaneously – an 80% productivity improvement."

Cases Assigned (Individuals or teams) → Coders, login, access worklist, open cases → Coders enter codes into Central Learning → Central Learning scores each case against Answer Key → Coder's accuracy rate and skill gap analysis compiled → Baseline percentages established for monitoring → Coder performance report cards generated → Dashboards drill down by coder, DRG and more

Automated Coding Audits and Assessments

Top 5 Scores

Endocrine	87.9%
Circulatory System	87.2%
Respiratory System	86.0%
Nervous System	85.5%
Perinatal	84.0%

Inpatient ICD-10 Diagnosis Accuracy Scores as of 1/1/2016

Bottom 5 Scores

Congenital	53.5%
External Causes	57.4%
Signs & Symptoms	68.5%
Injury, Poison	70.0%
Ear & Mastoid	74.3%

Central Learning measures coder accuracy scores—by code, coder or case. The application organizes each coder's individual strengths and weaknesses this quarter, last quarter and across time. Stop guessing and start knowing with Central Learning.

"Central Learning is the most robust and comprehensive audit, assessment and learning application in the industry today".
AHIMA 2016
